

W-LAN SCANNER

Entry-Level Barcode Solution

CE scanners for ALFAK users — Do you want to use the state-of-the-art WLAN scanner technology? ALBAT + WIRSAM's fully integrated barcode solution* in connection with ultra-modern MICROSOFT Windows CE scanners now permit instant and cable-less registration. All scans are entered in the database straight away, and the user gets immediate feedback as to whether data registration has been successful.

Partner

This entry-level solution in the scanning process technology makes your data more transparent. Whether in the incoming goods – or in the shipping department – you will feel the benefits in your daily business! The scanners used are extremely robust industrial computers which are connected directly to your Wi-Fi and therefore require no cables or readout stations. Equipped with the Windows CE operating system, they simplify the technical integration and allow intuitive and easy working. —

The following processes are already being supported – more to follow:

- Booking of goods received
- Status reports per order item
- Stock transactions
- Order information

* Prerequisite for using this barcode solution is the ERP system ALFAK
