# CANTOR ERP

## for the window professional

Order Entry/Detailed Information

### CANTOR – the cockpit for your business!

CANTOR ERP is a comprehensive software solution for your specific requirements and supports you in all microeconomic processes of your business.

The CANTOR tools for your backoffice team create a tailored environment for individual users, focusing on necessary tasks

From proposal management to order entry including credit limit check, purchasing and material handling up to invoicing. All microeconomic processes of your business are supported in the best possible way.

CANTOR is the ideal tool for your business.

### Make your business transparent!

CANTOR can show you the status of each window at anytime; thus you can inform your customer directly and save the time consuming search in the production area.

Adopt the organizational talent of our software and never again forget accessories, special glass or parts with long delivery times. CANTOR gladly reminds you, because immediately after order entry, CANTOR knows all due dates – from material order up to installation date- and marks these in the calendars of each relevant department.

The functionalities of CANTOR support your process flow and ensure that no window or element is forgotten.

### Sales and order entry

With the CANTOR ERP functionalities the commercial and technical processing of your offers and orders is done. Whether you produce windows from wood, aluminum or PVC, or if these are standard or special design – the CANTOR order entry allows everything within the same order.

The preparation of alternate offers is done with a single click of the mouse – even in different materials. The intelligent functionalities for pricing take this work from your employees and ensure that the correct price is offered.

### Dealer

Increase your sales with our dealer version of CANTOR!

With CANTOR you supply a tool to your dealers that ensures a safe entry for offers and orders. Having the best commercial and technical tool your dealers can promote

Comprehensive certification:

ALBAT+WIRSAM are Microsoft Gold Certified Partner. CANTOR is officially certified from Microsoft for Windows Vista and Windows 7.

# Always in the right

## Where exactly can CANTOR help you?

- Ideal linking of your business processes
- Your employees focus upon the main tasks
- Easy and safe order entry
- Professional integration of your dealers
- Safe entry of special design
- Transparency of your business data
- Reduced capital commitment to inventory optimized material management
- One central data base as source of information
- And much more

your product the best possible way. Orders are transferred directly online into your system, so double order entry is history.

Furthermore you can make use of the CANTOR tools for customer retention and increase your customer satisfaction: they can check the status of their orders online in real-time.

### **CAD and special design**

Not every special design needs to become a challenge for your team. CANTOR CAD enables you to design complex special constructions whilst having the prices calculated from the system.

### **Management and statistics**

With CANTORs tools for management and statistics you can design your personal cockpit to manage all aspects of your business. CANTOR supplies you with interdivisional online-reports for your

administrative decisions. Top customers and the latest sales orders at a glance and always be informed about the economical situation of your business.

### **Finances**

The ERP tools of CANTOR take care of your financials safety. Before creating the order confirmation CANTOR performs a credit limit check and considers your individual delivery stop. CANTOR automatically invoices for you and is of course interacting with your accounting system.

With CANTOR you ensure to be up to date about open invoices and your outstanding orders still to be invoiced.

### **Purchasing and material management**

Reduced capital commitment to inventory due to optimized material management!

CANTORs tools support you in tailored to suit and on time material planning. This way your warehouse stock is always at optimal level. Required materials are ordered to arrive when they are required – CANTOR's "just-in-time" and "lean manufacturing" concept eliminates material shortages and also reduces material holdings.

CANTOR knows your warehouse stock at any time and considers even the smallest move of any item. With the help of openTRANS we support your automated order management as well as the electronic communication with your suppliers.

### **Always in the right!**

With CANTOR you have the full view and manage your business to the optimum!

The image displays a grid of software modules for CANTOR, organized into two main sections: ERP and PPS / CIM. Each module is represented by an icon and a text label.

Section	Module	Icon Description
